

Students who qualify for gifted-education services at Qatar Foundation have gone through a process which includes, teacher observation, parent input, and CogAT or NNAT testing.

If your child has been selected and is in KG-Grade 5, in addition to support within the general education classroom, we will provide some targeted enrichment opportunities to support their academic strengths.

If your child is transitioning to QAK Senior School, the Gifted Coordinator will monitor grades and any issues/concerns will be addressed. Students will also be encouraged to participate in a range of enrichment learning activities tailored to those with high academic ability.

If you would like more information or would like to reach out the Gifted program Coordinator at Qatar Foundation, please click on the following email address: bghalati@qf.org.qa
